I received this as well. We might want to call Jean in the next few days...she continues to see warfare as the only option. Problematic.

Ex. 6 - Personal Privacy

Good Morning Lucy,

I am writing for your help. From our perspective something disastrous is happening and the Friends of Toppenish Creek wish to respond. In recent weeks industrial agriculture has successfully launched a campaign against the Swinomish Tribal Community and their EPA funded public outreach program, *What's Upstream*. We believe that this will not stop here but will lead to a cut back in EPA support for public education and information.

Can you or a member of your staff tell us when any related meetings or discussions take place so we can provide input?

Thanks very much.

Jean Mendoza
